Our vision

For over 40 years, high-quality, user-friendly disinfectants have been a key element of Dr Schumacher's company. The vision and guiding principles, people and their health reflecting the spirit of our founder, Dr Henning Schumacher, remain the focus of both our long-term goals and our day-to-day operations.

Under the leadership of Dr Henning Schumacher, Dr Schumacher GmbH was established in 1978 in Melsungen, Germany. Dr Henning Schumacher handed over the company to his sons Dierk and Jens Schumacher in the late 90s. The brothers continue to honour their father's legacy and philosophy as directors of the company today. The combination of innovation and tradition has shaped our history and has had a unique influence on the enthusiastic research and development of new products.

With more than 1,850 employees in nine countries and a distribution network spanning more than 70 countries, Dr Schumacher GmbH has become a globally recognized brand and one of Europe's leading suppliers in the development and production of disinfectant and hygiene products. We offer our customers a comprehensive full range of services, with hygiene, disinfection and care products for the medical sector or OEM, private label and cosmetic products for the consumer sector. Our headquarters in northern Hessen, currently in Malsfeld-Beiseförth, currently employs more than 500 people and continues to grow and add value. Top Quality Quality at Dr Schumacher It's not just a promise, it's a culture. As a leading leader in the medical and healthcare industry, we are conscious of our moral responsibility to our customers, end users and patients.

That's why we apply the highest quality standards and controls in our products and apply the latest technological developments and processes in our manufacturing. Our aim is to develop effective yet simple solutions that reliably protect staff and patients from infection and contamination. We also adhere to environmentally friendly working methods that conserve resources.

In addition, Dr Schumacher decided to transfer his experience in the field of health to industrial cleaning and care group products and started to serve in a new field.

Our aim, as Dr Schumacher Industrial, is to stand out from its competitors with completely environmentally friendly, maximum performance and economical products.

LAUNDRY HYGIENE

DeuPure DP200

Powder Detergent for Automatic Machines with TEAD Additive

- It can be used safely in hospitals, hotels, holiday villages, restaurants and kitchen laundry, and full and semi-automatic washing machines.
- Cotton, synthetic, cotton-synthetic blend, fibre complete washing suitable for washing all kinds of textiles Matic powder detergent.
- It provides perfect cleaning against heavy dirt such as oil, protein, and starch with the help of enzymes, TEAD, and bleaches that are effective against stubborn dirt.
- Effective even at low temperatures. While it removes difficult and stubborn stains without wearing out the clothes, it leaves a lasting scent with its pleasant perfume.
- It is used for washing all kinds of white and coloured laundry. It can be used safely with auxiliary washing agents.
- The dosage amount changes according to the hardness of the water used and the capacity of the machine.

REF 00-TR9DP200-200

Net 20kg

CAUTION

DeuPure DP202

Chlorine Based Powder Bleach

It is a safe bleach and stains remover with active chlorinating powder organic substances in its composition. Not recommended for coloured laundry, but can be used in colours that are stable to chlorine. It should not be used above 60°C. Especially suitable for white textiles. It is a good bleach for hospitals, hotels, restaurants, kitchens and factory textiles.

REF 00-TR9DP202-100

Net 10kg

HAZARD

CAUTION

DeuPure DP204

Heavy Dirt and Blood Remover

It should be washed with cold water in hospitals, hotels, holiday villages, restaurants, factories and kitchen laundry, in full and semi-automatic washing machines and presoaking. It should not be used on delicate laundry. It should be used together with the main wash while prewashing very dirty and problematic laundry. The solvents in its formula support the function of the main washing agent. It should not come into direct contact with the laundry.

REF 00-TR9DP204-100

Net 10kg

HAZARD

DeuPure DP206

Oxygen Bleach

It is suitable for hand washing in automatic machines, or normal machines. DeuPure DP206 adds whiteness by removing stains and odours from laundry. It is used with detergent in hot water. The temperature of the water should be at least 50°C. NEVER USE BLEACH FOR WASHING WITH DeuPure DP206.

REF 00-TR9DP206-100

Net 10kg

HAZARD

DeuPure DP208

Water Softener

The lime in the water accumulates on the resistance of the washing machine in each wash and causes the clothes to turn grey by penetrating the fibres.

The life of the washing machine is shortened, the washing performance decreases and the detergent consumption increases. When DeuPure DP208 is used with the main washing agent in every wash and temperature, the lime in the water becomes ineffective. It eliminates lime deposits thanks to the hardness binding agents in the water in its formula.

REF 00-TR9DP208-100

Net 10kg

CAUTION

DeuPure DP228

Protein Solvent

It can be used safely to remove protein containing blood, egg, milk and various sauce stains from heavily soiled laundry. It is also effective in cleaning cooked stains that cannot be removed with normal washing.

It is used in all kinds of washing machines and suppression tanks. It does not contain substances that can harm treatment plants. Hotel, dormitory, hospital, factory, restaurant etc. It is used for washing white and coloured laundry in places. It can be used safely in polyester, cotton or polyester/cottonmixed laundry. For gentle laundry, it should be tested on an invisible part of the laundry.

REF 00-TR9DP228-100

Net 10kg

CAUTION

DeuPure DP210

Foam Controlled Liquid Main Washing Agent

• It is a foam-controlled liquid laundry product developed to be used with liquid dosage systems.

• It provides a strong cleaning. Thanks to its liquid structure, it does not harm washing machines, does not leave residue, and does not cause blockage.

• With the help of special ion-retaining components in its content, it prevents the lime from the water and softens the water, thus giving softness to your laundry.

• Suitable for white, coloured, cotton / synthetic blend fibre textiles.

• It is recommended to be used together with oxygen-based liquid bleach and acidic neutralizer for heavily soiled and stained laundry.

REF 00-TR9DP210-200

Net 20L/23kg

HAZARD

DeuPure DP212

Chlorine Bleach and Stain Remover

It is used for bleaching white laundry. The temperature of the washing water for good bleaching is 30°C. and pH should be around 9.5. Bleach for white textiles (cotton/synthetic blend) and used as a stain remover.

It should not be used for cleaning/bleaching wool, silk and nylon.

REF 00-TR9DP212-200

Net 20L / 21,4kg

REF 00-TR9DP212-050

Net 5L / 5,35kg

DeuPure DP214

Oxygen Based Liquid Bleach

DeuPure DP214 is a washing aid. Tea, coffee, wine, fruit-vegetables etc. formed in the laundry. It removes stains by oxidizing. It is safe for all kinds of textiles. It does not harm the colours. It bleaches the white cotton textile, making it whiter. It increases the cleaning effect of the main washing agent. The active oxygen it contains ensures that the laundry is hygienic.

REF 00-TR9DP214-200

Net 20L/22kg

DeuPure DP216

*Heavy Dirt, Oil and Blood
Remover, Alkaline Liquid*

- It is an auxiliary washing product that removes heavy dirt, oil and blood, developed to be used with liquid dosing systems.
- It provides an effective and powerful cleaning in every water temperature and hardness. Thanks to its liquid structure, it does not harm washing machines, Does not leave residue, and does not cause blockage.
- It can be safely used as an auxiliary washing agent for cleaning heavily soiled and greasy kitchen laundry, and heavily soiled hospital laundry, in pre-wash or together with the main washing agent.

REF 00-TR9DP216-200

Net 20L/25kg

HAZARD

DeuPure DP218

Neutralizing Lime and Iron Binder

It should be used together with the main washing agent when the water hardness is very high. It prevents the calcification and greying of the clothes by eliminating the hardening ions in the water and increases the effect of the main wash product. It is a neutralizing lime and iron-binding liquid additive laundry product. It balances the pH as 5.5-6.0. It prevents the fabric from hardening and yellowing.

REF 00-TR9DP218-200

Net 20L/24,6kg

HAZARD

CAUTION

DeuPure DP220

Heavy Dirt and Oil Remover Auxiliary Washing Agent

- It is an auxiliary washing product that removes heavy dirt and oil, developed to be used with liquid dosing systems.
- It provides an effective and powerful cleaning in every water temperature and hardness. Thanks to its liquid structure, it does not harm washing machines, does not leave residue, and does not cause blockage.
- It is not alkaline. It gives excellent results in washing all kinds of white, coloured and gentle laundry.
- It can be safely used as an auxiliary washing agent for cleaning heavily soiled laundry, in pre-wash or together with the main washing agent.

REF 00-TR9DP220-200

Net 20L/20kg

CAUTION

DeuPure DP222

Laundry Softener

It softens your laundry and gives a pleasant smell. Makes ironing easier. It prevents static electricity. It provides excellent softness and fullness by fluffing the fibres, especially in towels and woollens.

REF 00-TR9DP222-200

Net 20L/20kg

REF 00-TR9DP222-050

Net 5L/5kg

CAUTION

DeuPure DP224

Laundry and Air Freshener

It is a perfume prepared for use in hotels and commercial laundries. When it is sprayed into the air, it provides a long and effective pleasant smell and is also effective in conditioning the air.

Its long-lasting, pleasant and lasting scent suppresses unwanted odours.
